Programs of specialist academic studies

The Faculty of Pharmacy organises and offers specialist academic studies based on the program accredited by the Ministry of Education, Science and Technological Development of the Republic of Serbia. The studies last for 12, 18 or 24 months, depending on the selected study program.

Industrial Pharmacy

(12 months – 60 ECTS)

This is the program that provides development of competencies for specific jobs in pharmaceutical industry in the area of formulations for pharmaceutical forms, production planning and organisation, as well as implementation of quality assurance requirements.

Pharmaceutical Management and Marketing

(12 months – 60 ECTS)

Study program that provides you with an opportunity to acquire academic knowledge in pharmaceutical management and marketing as well as to develop the competencies necessary for successfully running business processes and carrying out marketing activities.

Toxicological Risk Assessment of Environmental Contaminants

(12 months – 60 ECTS)

On successfully completing this program you will be capable of reviewing and analysing data on toxicological properties of the substances, assessing risk in specific conditions of exposure to various chemical substances, as well as correctly implementing regulations in the area of toxicology.

Cosmetology

(12 months – 60 ECTS)

On completing this program, as a specialist in cosmetology, you will be ready for specific jobs in the field related to national and EU rules on cosmetic products, and for tasks that concern formulation, preparation and testing of both cosmetic products for various purposes and dermo-cosmetic preparations. Moreover, you will be trained for providing reliable information and advice on application and effects of cosmetic products and dermo-cosmetic preparations, as well as any side effects they may have.

Release of Medical Products on the Market

(24 months – 120 ECTS)

Following the completion of this program you will become a competent professional with knowledge of pharmaceutical legislation and all legal and professional regulations that concern releasing medicines and medical devices into circulation, as well as advanced knowledge of critical quality parameters.

Pharmaceutical Care

(18 months – 90 ECTS)

This study program outcome is acquiring knowledge, competencies and skills for prevention, identification and solving problems related to application of medicines in individual patients, and monitoring patient outcome with the aim of continually providing effective therapy.
